

Roll the front third of the wing with a pencil to give an airfoil shape.

Overlap sides here.
Tape gear and boom tube support here before taping sides.

Fuselage tube support. Fold as shown and glue to tube at spot A. Glue in fuse at spots B.

wheels

Use wire for landing gear. Paper clip should work.

Fuselage boom tube. Fold into a prism shape. Must not be twisted.

Color your plane before printing. Don't forget a pilot! It won't fly without some weight up front.
